Plagiarism and AI technology use policies	1
Declaration of No Plagiarism and AI Technology Use	2
Summary	3
Question 1 (20 marks)	3
Question 2 (80 marks)	4
(a) Literature search and resources identified (12 marks)	5
(b) Your approach (24 marks)	5
(c) Activities and decisions made (24 marks)	5
(d) Structure, length, style, & clarity (20 marks)	6

Plagiarism and AI technology use policies:

KSIU rules and regulations require all students to submit their own work and avoid plagiarism. You must provide all references in case you use and quote another person's work in your Assignment. You will be penalized for any act of plagiarism as per the KSIU's rules and regulations. Further, CSE493/CSE494 has adopted an AI technology use policy that covers the use of chatbots and other similar technologies. A copy of this policy can be found on the course page of the LMS. Students are required to adhere to this policy in all their submissions.

Declaration of No Plagiarism and AI Technology use

(This page must be signed and submitted with your assignment)

I hereby declare that this submitted TMA work is a result of my own efforts and I have not plagiarized any other person's work. I have provided all references of information that I have used and quoted in my TMA work.

Did you use any AI technology tools? YES No

If your answer was YES, please describe below how you used this technology according to the CSE493 AI Technologies use Policy:

Student Name:.....

Signature:.....

Date:.....

Summary: The purpose of this assignment is to:

- help you understand and assess your own progress against your set targets so far.
- help you appreciate the need to plan a report before embarking on writing it by organizing and writing a report plan and a draft of part of your final project report.
- give you an opportunity to receive feedback from your tutor to help you prepare your project report.

You should carefully study the requirements for your project report in the associated project report guide.

Question 1: Your report outline (20 marks)

Learning outcomes

- *Communicate effectively in a 5000–7000-word report.*
- *Plan and organize your project work appropriately, and keep systematic records of your plans, progress, and achievements.*

Tasks:

Develop and present an outline plan of your project report. Your outline should give:

- a clear plan of your report's structure and contents, including the probable sections, subsections, and appendixes, with their titles.
- one or two sentences or bullet points about what you intend to discuss under each of the various section and subsection headings.
- what you intend to put into the appendixes.
- estimated word counts of the sections and subsections to help you plan your report to meet the 5000–7000-word requirement.

Marking Criteria:

- Meaningful titles for the sections of the report.
- A clear indication that all the areas required for the main report will be covered.
- A logical order. It should be possible to see the 'story' of your work by looking at the titles of the sections, subsections, and appendixes.
- A match between the content you have outlined and the titles.
- A clear division of the material into an appropriate number of sections and subsections. Too few or too many levels in your report may obscure the story you are telling.
- A notional 4 marks are allocated to each of these criteria, but your tutor has been asked to ensure that the total mark reflects the overall quality of the outline.

Question 2: Draft of part of your project report (80 marks)

Learning outcomes:

- *Analyze a practical problem and, where appropriate, devise and implement a solution building on the knowledge and skills developed in the related level 3 course.*
- *Gather, analyze, evaluate, and use relevant information to complete your project successfully.*
- *Keep systematic records of your plans, progress, and achievements.*
- *Demonstrate and apply a sound understanding of the fundamental technical concepts and principles relevant to your project.*
- *Communicate effectively in a 5000–7000-word report.*

Tasks:

- Read the final project report guide to understand what is the **plan-do-review-communicate** framework for writing a project report. Your final report should follow this framework.
- Plan the ‘do’ part of your project report, just as you did with the rest of the report, then
- Follow the plan you developed above and **write** a “draft” of this part of your project report.

You should plan your draft with your final project report in mind. To help you do this, read the section entitled: ‘What your report must cover’ in the project report guide document, posted to the course page on the University LMS. Carefully read the section entitled ‘Doing, which covers:

- What you did
- How you did it
- Why you did it in that way

In your draft you should indicate what evidence you will produce in your final report (without necessarily providing them at this stage) to support:

- Claims you make in connection with your project execution
- Conclusions you reached after completing the project
- Deliverables you promised to provide as a result of the project

Final report length:

Your final project report must be between 5000 and 7000 words in total, State the number of words you used in the draft of the ‘Do’ part. Obviously, it should not exceed what you had planned for.

The 80 marks for this question are allocated as follows:

(a) Literature search and resources identified (12 marks)

Using your **project log** you should report on:

- the gaps you had identified in your knowledge and understanding.
- the key resources and search strategies you used to locate the information you needed, and how useful they were (use your project log to provide evidence of the successes and failures of your search strategies).
- An assessment of the quality of the identified sources using a published evaluation criteria, like PROMPT, RADAR, PROVEN
- the practical steps you would take to improve your literature searching in the future.

Marking criteria:

- Relevance of your search methods to your project
- Quality of your assessment of the resources identified using standard criteria
- Following the project guidance for CSE493/ CSE494

(b) Your approach (24 marks)

referring to evidence from your **project log** provide:

- the approach or methods used to solve the problem identified early on in your project proposal
- your justification for choosing this particular approach or these specific methods as compared to other alternative approaches or methods. You should state both advantages and disadvantages of each approach.
- the software or modeling tools you used, what you used them for and their limitations, if any.

Marking criteria:

- Quality of the description of the approach or methods used
- Quality of the justification of the approach or methods used compared to alternatives
- Clarity of the description of the software and/or modeling tools used

(c) Activities and decisions made (Process) (24 marks)

Referring to evidence from your **project log** provide:

- A summary of the activities you undertook to achieve the aims and objectives you developed in your original project proposal.
- A brief description of any choices or decisions you had to make to complete your project on time.
- A justification of any decision or choice you had to make to complete your project on time.

- A description of your final product achievements:

marking criteria:

- Evidence of justified decision making and evaluation.
- Evidence of your achievements at every stage. for example:
 - For software projects, provide development artifacts such as design diagrams of different kinds
 - If your project includes a database, include the conceptual model, logical model, and normalization activities.
 - In all cases, you must demonstrate a thorough approach to specification, design and documentation..

(d) Structure, length, style, and clarity (20 marks)

- Read the section of the 'Communicate' part in the project report guide
- You must state the number of words you have used in your draft.

marking Criteria:

- A logical and clear structure of your report that tells a story.
- Inclusion of a clear introduction and a clear conclusion.
- Clear and correct with logical flow of ideas, even within paragraphs.
- Simplicity of presentation. You will be penalized for excessive use of unnecessary technical jargon or over complicated explanations.
- Clarity, conciseness, spelling, grammar, and punctuation.
- Appropriate length in relation to the targeted length of the project report. For example, don't use 200 words or 4000 words in the 'do' part if you are aiming for a 5000-word final report. You must state the number of words you have used in your draft.
